What Is the Basma App?

A smart education management system that improves the day-to-day school environment by giving direct visibility into every learner's status and simplifying administrative work for teachers and school staff.

Overview

Basma lets school administration follow a learner's status directly, through a range of services that help teachers carry out their duties, reduce administrative load, and raise the quality of their in-class performance – which in turn reflects positively on the learner's academic achievement. The system also provides an innovative way to assess a learner's educational and behavioral performance, and builds an oversight partnership between the school and the learner's parent.

Origin and Growth

The idea began as a "Student Follow-up System," and as technology evolved, many innovative features were added to cover broader ground, becoming "Basma: the Smart Education Management System." The app has won first place across Kuwait and the Arab world in education (the ALECSO Grand Prize for Mobile Applications, Tunisia 2017), the ESCWA Prize for Arabic Digital Content for Sustainable Development 2022, and the Kuwait Award for Education Technology 2023 as the Ministry of Education's best project idea.

Vision

Global leadership in advancing the educational process.

Mission

To build and operate a globally competitive, innovative education system that raises the effectiveness of education professionals and improves the quality of educational outcomes, in an environment that helps shape a generation of learners capable of building the future.

System Goals

Basma aims to achieve a number of educational and administrative goals, most notably:

- 1 Rationalizing the school's consumption of physical resources (less paper and manual printing).
- 2 Providing an easy, accurate way to track learners academically and behaviorally within the school building.
- 3 Reducing the load on teachers tasked with administrative supervision, freeing them to focus on behavioral cases.
- 4 Curbing negative phenomena within the school building and strengthening preventive safety for learners.
- 5 Helping instill noble moral values rooted in our Islamic faith and authentic Arab traditions.
- 6 Providing the means to attract qualified teaching staff and make the best use of their efforts.
- 7 Helping raise a generation of youth who are self-aware, identity-conscious, and contribute to the national vision.
- 8 Providing a motivational mechanism (points, titles, and achievements) that builds a student's inner drive toward discipline and excellence.

Key Features at a Glance

A complete toolkit that makes Basma a full system, not just an attendance log.

1 A single learner record: absences, disciplinary action, medical notes, and verbal performance evaluation, all in one place.

2 Attendance, absence, and morning line-up lateness recorded with a few taps from the teacher's phone.

3 AI-assisted assessment of a learner's educational and behavioral performance.

4 A motivational system (skill tree, titles, secret achievements) that builds a student's own drive toward discipline.

5 Direct private messaging between administration, teachers, and parents.

6 Issuing and printing official reports: medical reports, disciplinary action, early-leave permits, pledges, and parent summons.

7 Works fully offline, with automatic data sync once the connection returns.

8 A complete web dashboard for school management, with more than 20 print-ready reports.

User Types and Permissions

The app supports five account types, each with its own interface and permissions that appear automatically after sign-in based on the account type.

User Type	Description	Section in This Guide
● System Admin (School Principal)	The broadest permission level; full management of users, classes, settings, and reports	Part One
● Moderator	Tracks lateness, absence, and student reports without full administrative rights	Part Two
● Teacher	Takes attendance and adds notes and evaluations for their own class's students only	Part Three
● Student	Follows their own achievements, performance notes, and warning report	Part Four
● Parent	Follows their children's records and communicates directly with school staff	Part Five

Signing In and Core Navigation

1 The Sign-in Screen

The starting point for every user type. The app automatically recognizes the account type (System Admin, Moderator, Teacher, Student, Parent) right after sign-in, and shows the matching interface and permissions.

- Enter your **username** (the civil ID for a student/parent, or the assigned username for teachers and staff).
- Enter your **password** – tap the eye icon to reveal it.
- Turn on **"Remember me"** for faster sign-in next time.
- If you forget your password, use the "Forgot password?" link.
- Tap **"Sign in"** to continue, or "Don't have an account? Create one" to register a new school.

Accounts that have signed in on this device before appear as quick-access cards above the form – just tap one to sign in instantly without retyping your details.

Persistent Navigation Elements

 Side Menu	Opened via the three-line icon at the top of any screen; it holds every management, settings, and support page, and its contents vary by user type.
 Bottom Tab Bar	Each user type gets a fixed set of tabs for quick access to its most important screens (e.g. classes, late arrivals, and progress tracking for teachers/admins, or titles and notes for students).
 Notifications	The "Notifications" tab is available to every user, showing system alerts (warnings, messages, updates) the moment they're issued.
 Switch Account	The "Switch account" button at the top of the side menu lets you jump instantly between multiple accounts signed in on the same device, without a full sign-out.

Quick Start Guide

Five steps to get your school's Basma account up and running, from registration to the first attendance record.

1 Register your school: From the sign-in screen, tap "Don't have an account? Create one," then enter the school name and address, a username and password, country, email, and contact number. The account is created automatically with System Admin rights.

2 First sign-in: Sign in with the System Admin account; you'll land directly on the home screen (class list), which is empty until you create your first class.

3 Build the academic structure: From the side menu, create your classes, then add teacher accounts and assign each teacher their classes, then add students (individually or by importing a full list) and assign them to the right classes.

4 Link parents: Share the "Parent registration link" from the side menu with parents; their sign-up requests arrive in "Manage Parents" for you to review and approve, automatically linking them to their children.

5 The first school day: The teacher opens their class from the bottom tab bar and takes attendance with one tap per period – and from there, every student's record starts building itself automatically.

Every role has its own dedicated section in this guide covering all of its screens in detail – use the table of contents to jump straight to the right part.

Part One

System Admin (School Principal)

The account with the broadest permissions in the app: manages classes and users (teachers, students, and parents), tracks reports, lateness, and absences, communicates with every party, and controls school settings and the subscription.

Managing Users

Reports

Communication

School Settings

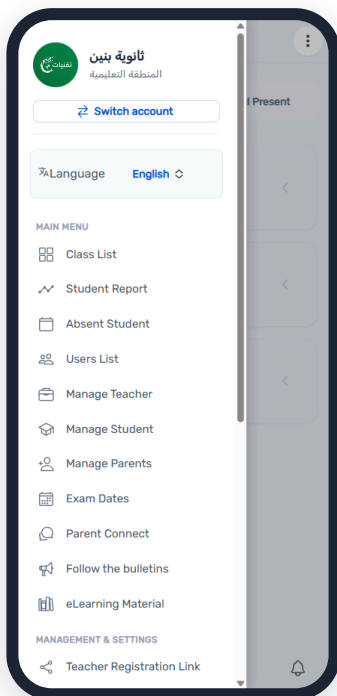

Home Screen and Side Menu

1 Home Screen – Class List

The first screen shown after signing in. It shows a card for every class in the school, each with the class name and a short description (e.g. "Grade 10").

- **"Class List"** tab: shows every class; tap one to open its details and student list.
- **"Statistical Present"** tab: a quick summary of daily attendance rates per period.
- The bottom bar lets you jump quickly between: Classes, Late-Arrival List, Progress Tracking, and News.

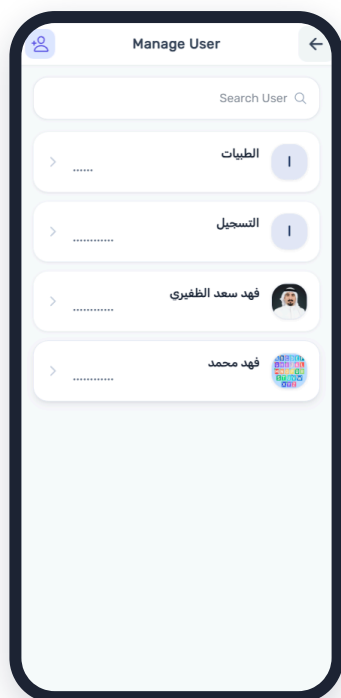

2 The Side Menu

Opened from the three-line icon at the top of any screen – the main gateway to every administrative page. It opens with the current school's card and a "Switch account" button, followed by the language selector (Arabic/English).

- **Main Menu:** Home, Student Report, Absent-Student Requests, Users List, Manage Teacher/Student/Parent accounts, Exam Dates, Parent Connect, Follow the Bulletins, eLearning Material.
- **Management & Settings:** Teacher Registration Link, Parent Registration Link, Settings, Devices, Activate Features (Plans), Backend Link, Contact Us, About Us.
- **Legal:** Terms of Service, Privacy Policy, followed by Logout at the bottom.

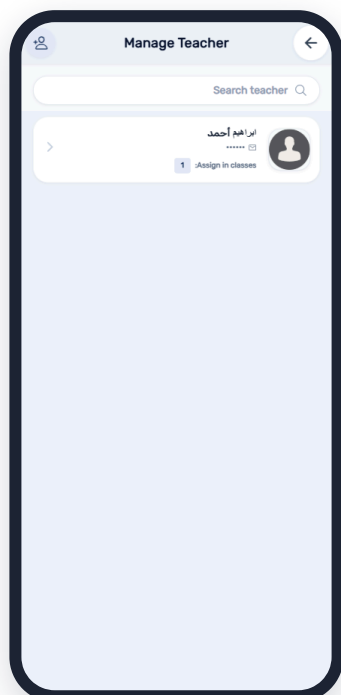

Managing Users and Teachers

3 Users List

Shows administrative/support accounts linked to the school (such as the medical, registration, or additional system-admin accounts), with each user's name, account number, and photo.

- Use the **"Search for a user"** box to narrow results quickly.
- Tap the **"+"** button at the top of the screen to add a new user and set their permission level.
- Tap any card to view a user's details or edit their permissions.

4 Manage Teacher Accounts

Shows every teacher registered at the school along with their account number and the number of classes assigned to them.

- Search for a teacher by name from the search box at the top.
- Tap a teacher's card to view their details or edit their assigned classes.
- You can also add a new teacher manually from this screen, or share the "Teacher registration link" from the side menu.

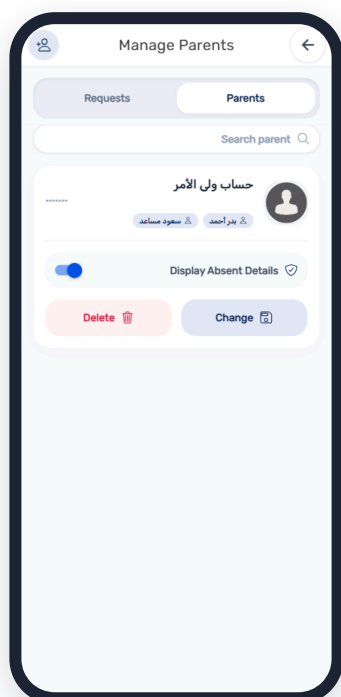

Managing Students and Parents

5 Manage Student Accounts

Complete management of student data: adding students individually or in bulk, editing a student's details, and transferring or deactivating an account when needed.

- Browse students by class, or search for a specific student by name or civil ID.
- Students can be added manually one at a time, or imported as a complete list.
- Tap any student to open their full record (absences, notes, evaluations, reports).

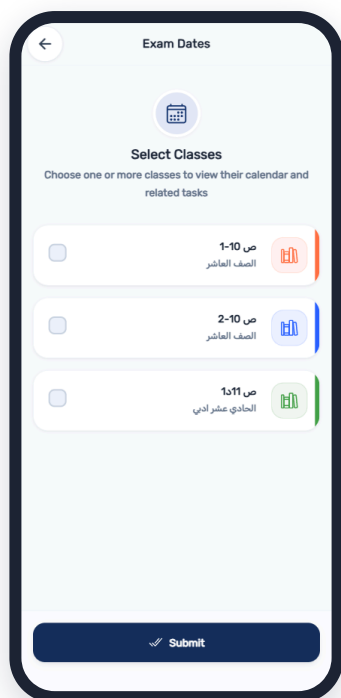

6 Manage Parent Accounts

Two sub-tabs: "Parents" (active accounts) and "Join Requests" (new accounts awaiting approval).

- Each card shows the account holder's name and the children linked to it.
- The **"Show absence details"** toggle controls whether the parent can see their child's daily absence details.
- **"Delete"** and **"Save changes"** buttons under each card manage the account.

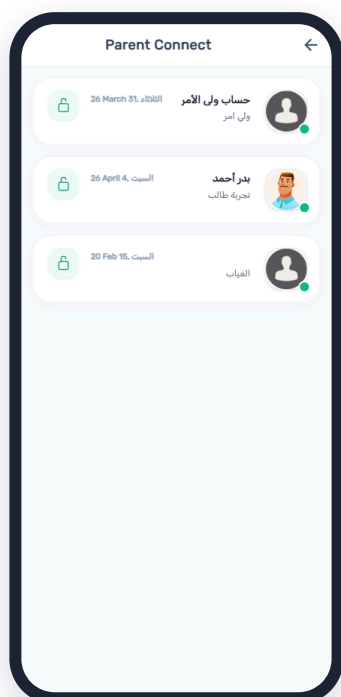

Calendar and Communication

7 Exam Dates (Calendar)

Organize and schedule quizzes and tasks for one or more classes from a single place.

- Select one or more classes by tapping the checkbox next to each name.
- Tap **"Submit"** to move on to setting the event's details and date.
- Added dates then appear in a shared calendar teachers and students can view.

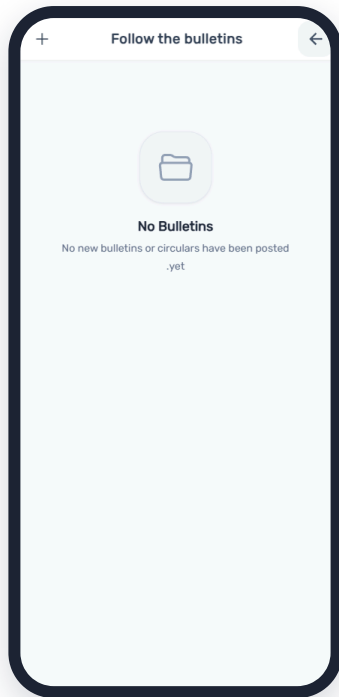

8 Parent Connect

A unified list of every private conversation between school staff and parents or teachers, sorted by latest message.

- Each card shows the other party's name and role (parent, student, ...) and the date of the last message.
- Tap any card to open the full conversation and reply directly.

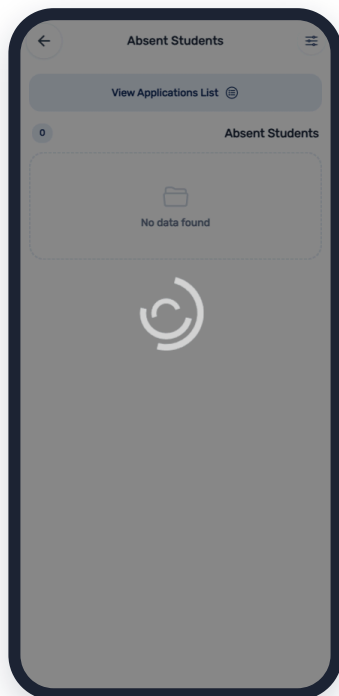

Bulletins and Absence-Edit Requests

9 Follow the Bulletins

A list of circulars and bulletins issued by the administration, whether for a whole class or a specific group of learners.

- Tap the "+" icon at the top of the screen to create a new bulletin.
- Choose the target audience (a whole class / specific students), then enter the bulletin text.
- When no bulletins exist yet, the screen shows a "No bulletins found" message by default, as in the example shown.

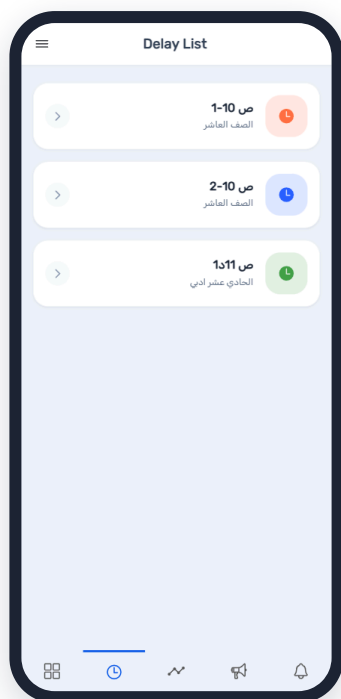

10 Absent Students – Absence-Edit Requests

A quick roll-up of daily absences across every class, plus absence-edit requests submitted by teachers for review and approval.

- The "**View submitted requests list**" button at the top jumps straight to the list of pending requests.
- The filter icon at the top narrows results by class or date.
- When no data exists for the selected day, a "No data found" message appears.

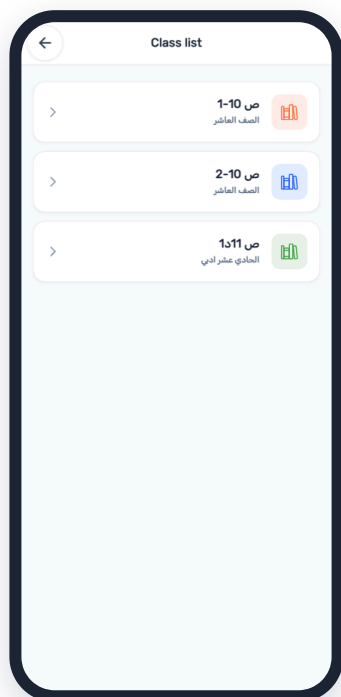

Late-Arrival List and Reports

Two screens reachable directly from the bottom bar and the side menu.

11 Late-Arrival List

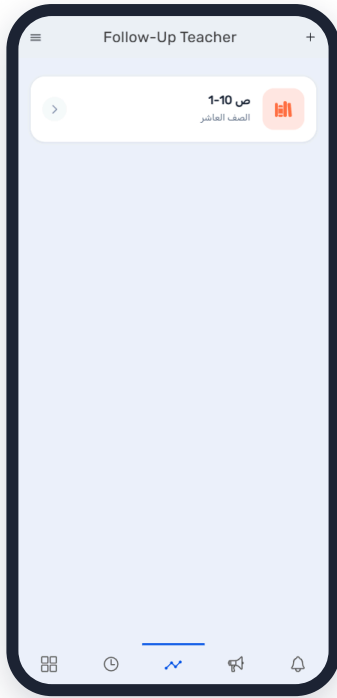

Pick a class first, then record any student's lateness to the morning line-up. The system automatically converts repeated lateness into an absence per the "lateness rule" set in the school's settings.

12 Student Report

Select the class first, then choose the report type: absence report, disciplinary action, medical notes, early-leave permit, or educational performance – with the option to print or save as a PDF.

Progress Tracking and News

13 Progress Tracking

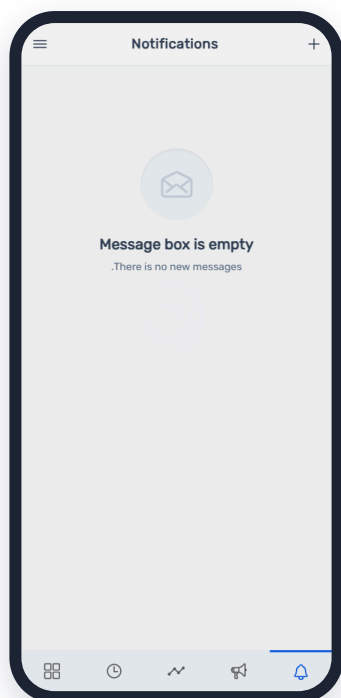

An analytics dashboard showing student and class performance indicators (attendance, behavior, evaluation) in a simple visual layout that supports administrative decisions.

14 News

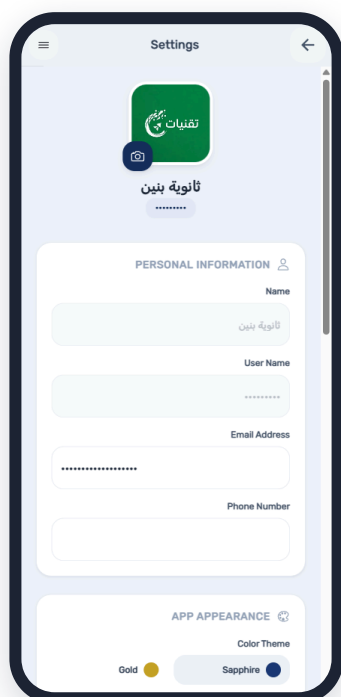

The latest news and general announcements issued by school administration for every app user.

Notifications and Settings

15 Notifications

A timeline of every incoming alert (warnings, requests, updates); a red badge appears next to its icon whenever there's an unread notification.

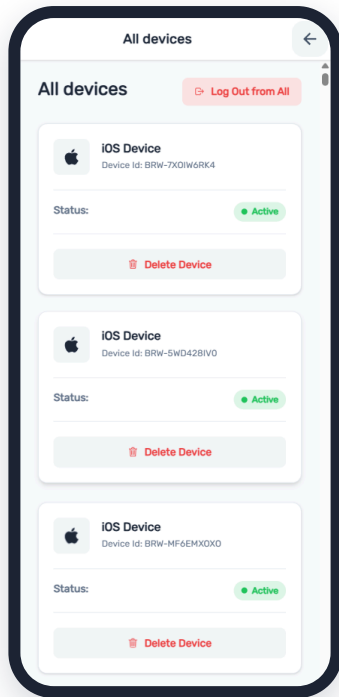

16 Settings

Edit your account's personal details (email, phone number), and change your password from the "Security & Password" section.

- For System Admin specifically: an extra **"School Settings"** section lets you turn on parent/teacher registration links, set the "lateness rule" and the first/second/third warning-day thresholds, and choose the country.
- The **"Save"** button at the bottom applies any change.

Registered Devices and Subscription

17 Registered Devices

A list of every device that has signed in with the current user's account, with the option to remotely sign a device out for security reasons.

Plans and Subscription

From the side menu, the "Activate Features" screen lets the System Admin review the school's current subscription plan and its included features (such as eLearning material and advanced reports), and upgrade to a higher plan when needed.

Part Two

Moderator

An account dedicated to day-to-day class oversight: tracking lateness, absence, and student reports, without the System Admin's full user-management rights.

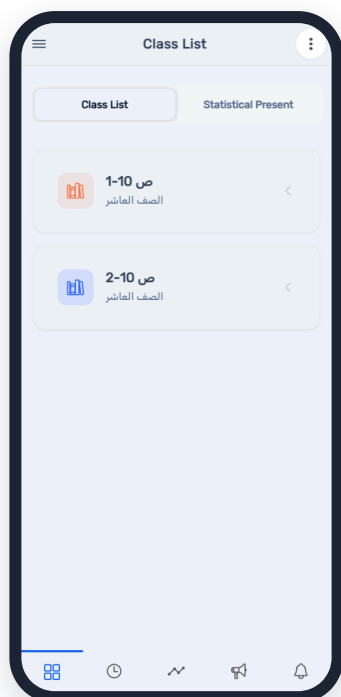

Late-Arrival List

Student Report

Progress Tracking

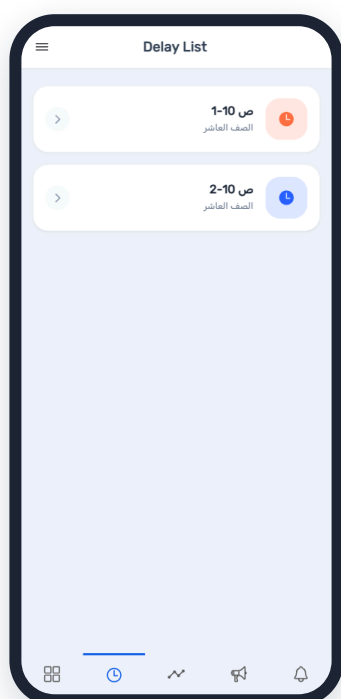

Class List and Late Arrivals

The Moderator interface looks much like the System Admin's, but with a narrower scope: the side menu is limited to "Student Report," alongside the bottom bar dedicated to tracking classes, lateness, and progress.

1 Class List

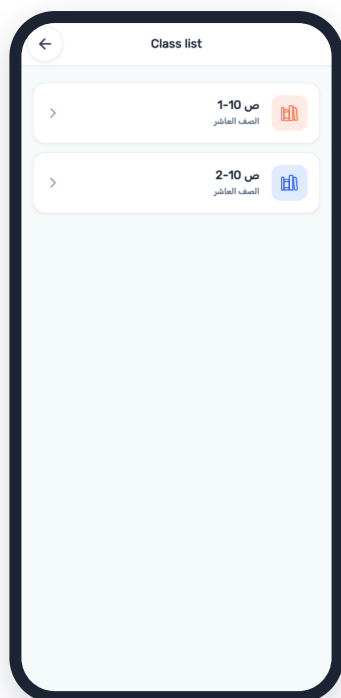

Shows the school classes available to the Moderator; tapping any class opens its details and student list to follow its status.

2 Late-Arrival List

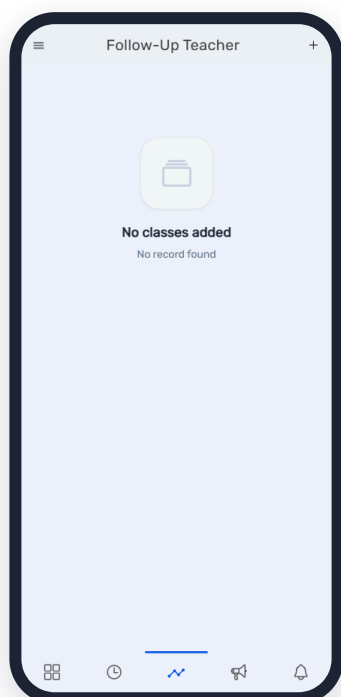

Records student lateness to the morning line-up per class, using the same mechanism as the System Admin's own late-arrival screen.

Student Report and Progress Tracking

3 Student Report

Select the class first to reach its available reports (absence, behavior, medical notes), with the option to print when needed.

4 Progress Tracking

The same analytics dashboard available to the System Admin, showing attendance, behavior, and performance indicators for the Moderator's classes.

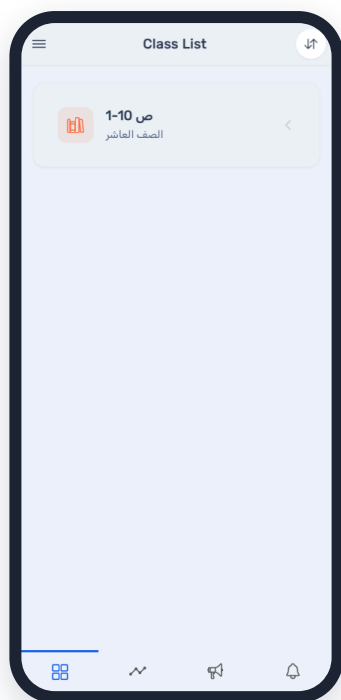

Part Three

Teacher

The teacher's daily tool inside the classroom: one-tap attendance, student performance evaluation, and following bulletins and news issued by the administration.

[Taking Attendance](#)[Evaluating Students](#)[Bulletins](#)

Class List and Taking Attendance

1 Class List

Shows only the classes assigned to this teacher. Tapping a class goes straight to the attendance screen for that period.

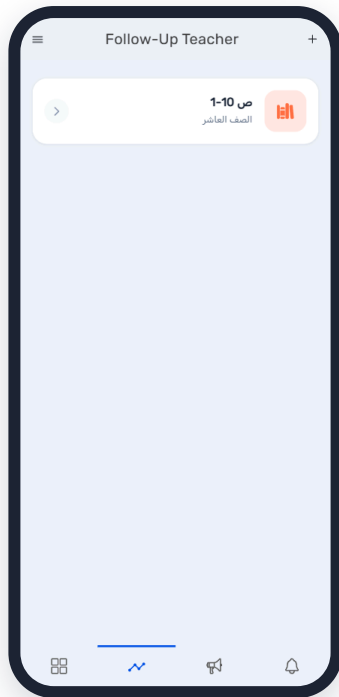

2 Taking Attendance

The teacher's daily go-to screen. It shows the period number and date at the top, along with a "Cumulative Class Strength" indicator (total motivation points).

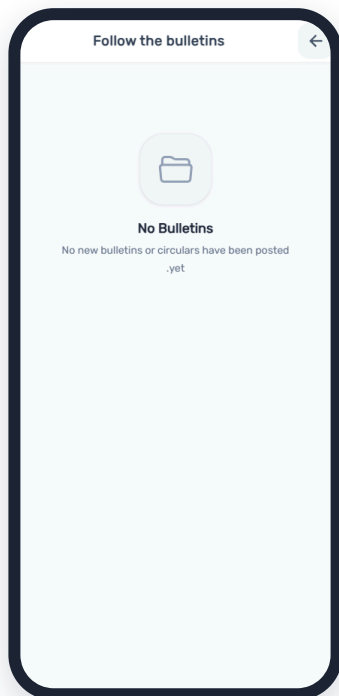

- "All Present" and "All Absent" buttons set the whole class's status in one tap, then individual exceptions can be adjusted.
- Each student has independent "Present" / "Absent" buttons, alongside their current performance level and achievement badge (e.g. "Rookie Champion").
- The "+" icon next to a student's photo opens a window to quickly add an evaluation or note for them.
- The bottom of the screen shows a "Recorded ... of ..." counter – tap "Submit" to save attendance.

Progress Tracking and Bulletins

3 Progress Tracking

Quick performance indicators for the teacher's own students, helping identify who needs extra attention.

4 Follow the Bulletins

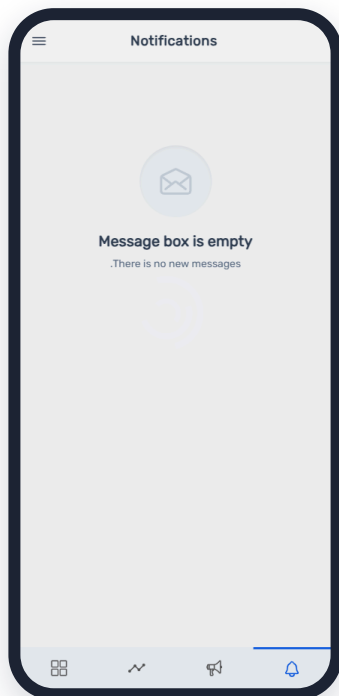

A teacher can send reminders and quiz dates to a whole class or a specific group of students, and view circulars issued by administration.

News and Notifications

5 News

The latest general school announcements and news.

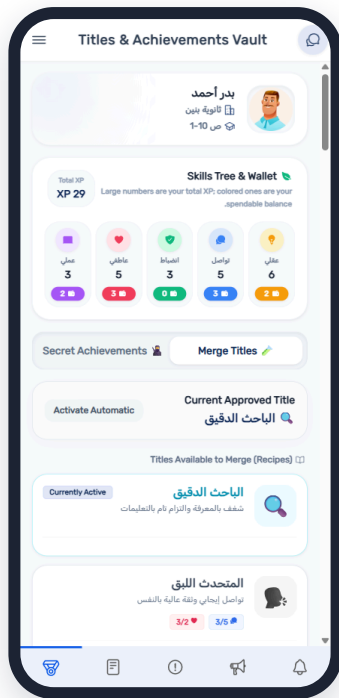

6 Notifications

A log of alerts specific to this teacher (requests, attendance updates, replies from administration).

Student Screens

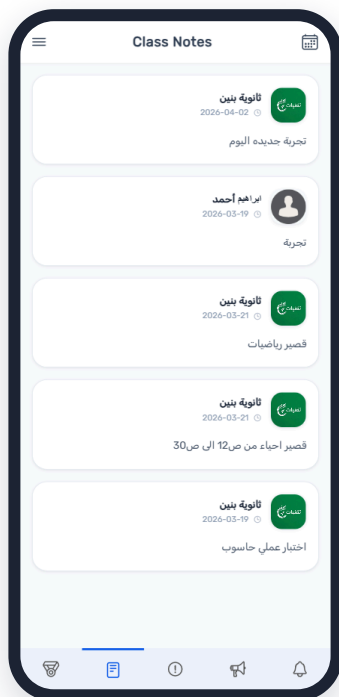

Students don't see an expanded side menu; their whole experience is built around four tabs in the bottom bar.

1 Titles & Achievements Vault

The default screen after signing in. Shows the student's card, the "Skill Tree & Portfolio" (experience points spread across five skills: Practical, Emotional, Discipline, Communication, and Intellectual), the currently active title, and titles available to merge.

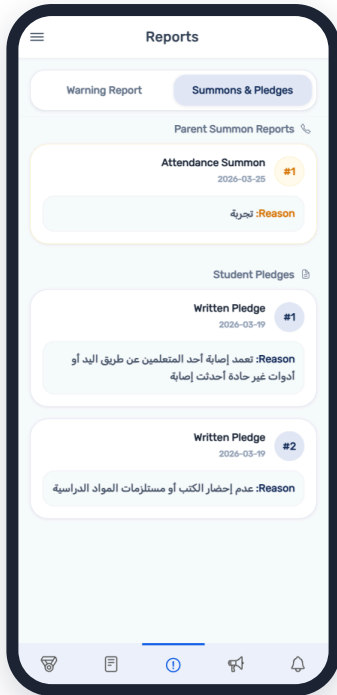

- Students earn points automatically from teachers' daily evaluations and attendance discipline.
- The "Auto-activate" option next to the current title lets the system automatically pick the most fitting title as points change.
- "Merge Titles" tab versus "Secret Achievements" tab below the student's card.

2 Student Notes

A record of every note and evaluation added by teachers and school administration for this student's performance, sorted chronologically.

Warning Report and News

3 Warning Report

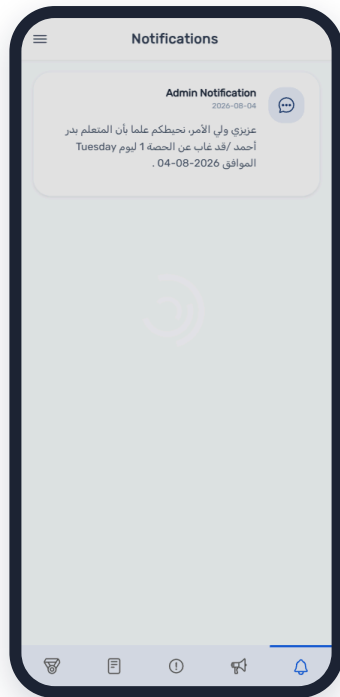

Shows the student's absence-day count against the first, second, and third warning thresholds set by the school administration, keeping the student always aware of their standing before any official warning is issued.

4 News

The latest school news and announcements aimed at all students.

Notifications

5 Notifications

Instant alerts whenever a new evaluation is added, a warning is issued, or a bulletin concerning the student is posted. From this screen, a student can review every past notification, newest first.

Part Five

Parent

A direct oversight partnership between the parent and the school, to follow their children day-to-day and communicate with administration without needing to visit the school.

Following Children

Private Messaging

Instant Notifications

Parent Screens

Like the student experience, the parent's experience is built directly around the bottom tab bar without an expanded side menu, and centers on following children and communicating with the school.

1 My Children

The default screen after signing in. Shows a card for each child linked to the parent's account (name, photo, and class). Tapping a child's card opens their complete record: total absence days and their type (excused / unexcused), disciplinary-action and medical-leave days, and their teachers' verbal performance evaluation.

2 Private Messaging

A direct conversation with school administration to ask questions or follow up on anything concerning the child. New messages arrive as instant notifications for both sides, and a red badge appears on the tab icon whenever there's an unread message.

3 News

The latest general announcements and circulars issued by school administration, plus automatic alerts whenever a child's absence is recorded or a warning is issued for them.

4 Settings

From the side menu, a parent can edit their personal details (email and phone number) and password, and review the devices registered to their account.

Frequently Asked Questions & Help

Quick answers to the app's most common questions, linked back to the detailed screens in this guide.

? I forgot my password — what do I do?

On the sign-in screen, tap the "Forgot password?" link and follow the steps to reset it. You can also change your password later from "Settings" after signing in.

? How do I add a new teacher or student?

From the side menu, choose "Manage Teacher" or "Manage Student," then add an account manually one at a time, or import a complete student list at once. You can also share the "Teacher registration link" so a teacher registers their own details.

? Does the app work without an internet connection?

Yes. A teacher can take attendance even if the network drops inside the school building, and the data syncs to the server automatically the moment the connection returns.

? How are a student's points and title calculated?

Points are calculated automatically from teachers' daily evaluations and attendance discipline, and are spread across five skills in the "Skill Tree & Portfolio." The system picks the most fitting title automatically (or manually) based on this point total – see the Student section for details on the Titles Vault.

? How does repeated lateness turn into an absence?

Per the "lateness rule" the System Admin sets on the Settings screen; once a student exceeds the configured number of late arrivals, the system automatically records an absence day instead of a lateness.

Frequently Asked Questions (continued)

? How do I print a report or save it as a PDF?

From "Student Report," pick the class, then the report type (absence, disciplinary action, medical notes, early-leave permit, or educational performance) – print or save-as-PDF options appear right there.

? Who can see my child's absence details?

The System Admin controls this via the "Show absence details" toggle on the "Manage Parent Accounts" screen, so daily absence details can be made visible or hidden to a parent depending on school policy.

? How do I switch between multiple accounts on the same device?

Tap the "Switch account" button at the top of the side menu to jump instantly between accounts previously signed in on this device, without a full sign-out every time.

? How do I contact app support?

From the System Admin account, choose "Contact Us" from the side menu for direct access to support channels.

? What happens when a school account deletion is requested?

The account enters a temporary grace period before permanent deletion, during which a message shows the remaining time along with an "Undo account deletion" option for anyone who changes their mind.

Glossary of Terms

Key terms used throughout the app and this guide.

System Admin	The school principal's account, with the broadest permission level in the app.
Moderator	An account dedicated to tracking daily lateness, absence, and student reports.
Learner Record	A student's complete file: absences, disciplinary action, medical notes, and verbal evaluation.
Skill Tree & Portfolio	The spread of a student's experience points across five skills: Practical, Emotional, Discipline, Communication, and Intellectual.
Titles & Achievements Vault	The set of motivational titles a student earns based on their points, which can be merged or auto-activated.
Secret Achievements	Extra hidden achievements a student gradually discovers as an added incentive for discipline and excellence.
Lateness Rule	The number of allowed late arrivals before they're automatically converted into an absence day, set by the System Admin.
Warning Report	Compares a student's absence-day count against the first, second, and third warning thresholds set by the school.
Private Messaging	Direct conversations between school administration and parents or teachers.
Early-Leave Permit	An official report documenting a student leaving school before the end of the school day.
Disciplinary Action	A formal disciplinary measure, documented and printed as a report from Student Report.
eLearning Material	Electronic educational content available under non-free subscription plans.
